

Remediation: A Journey of Sixth Sense with Images

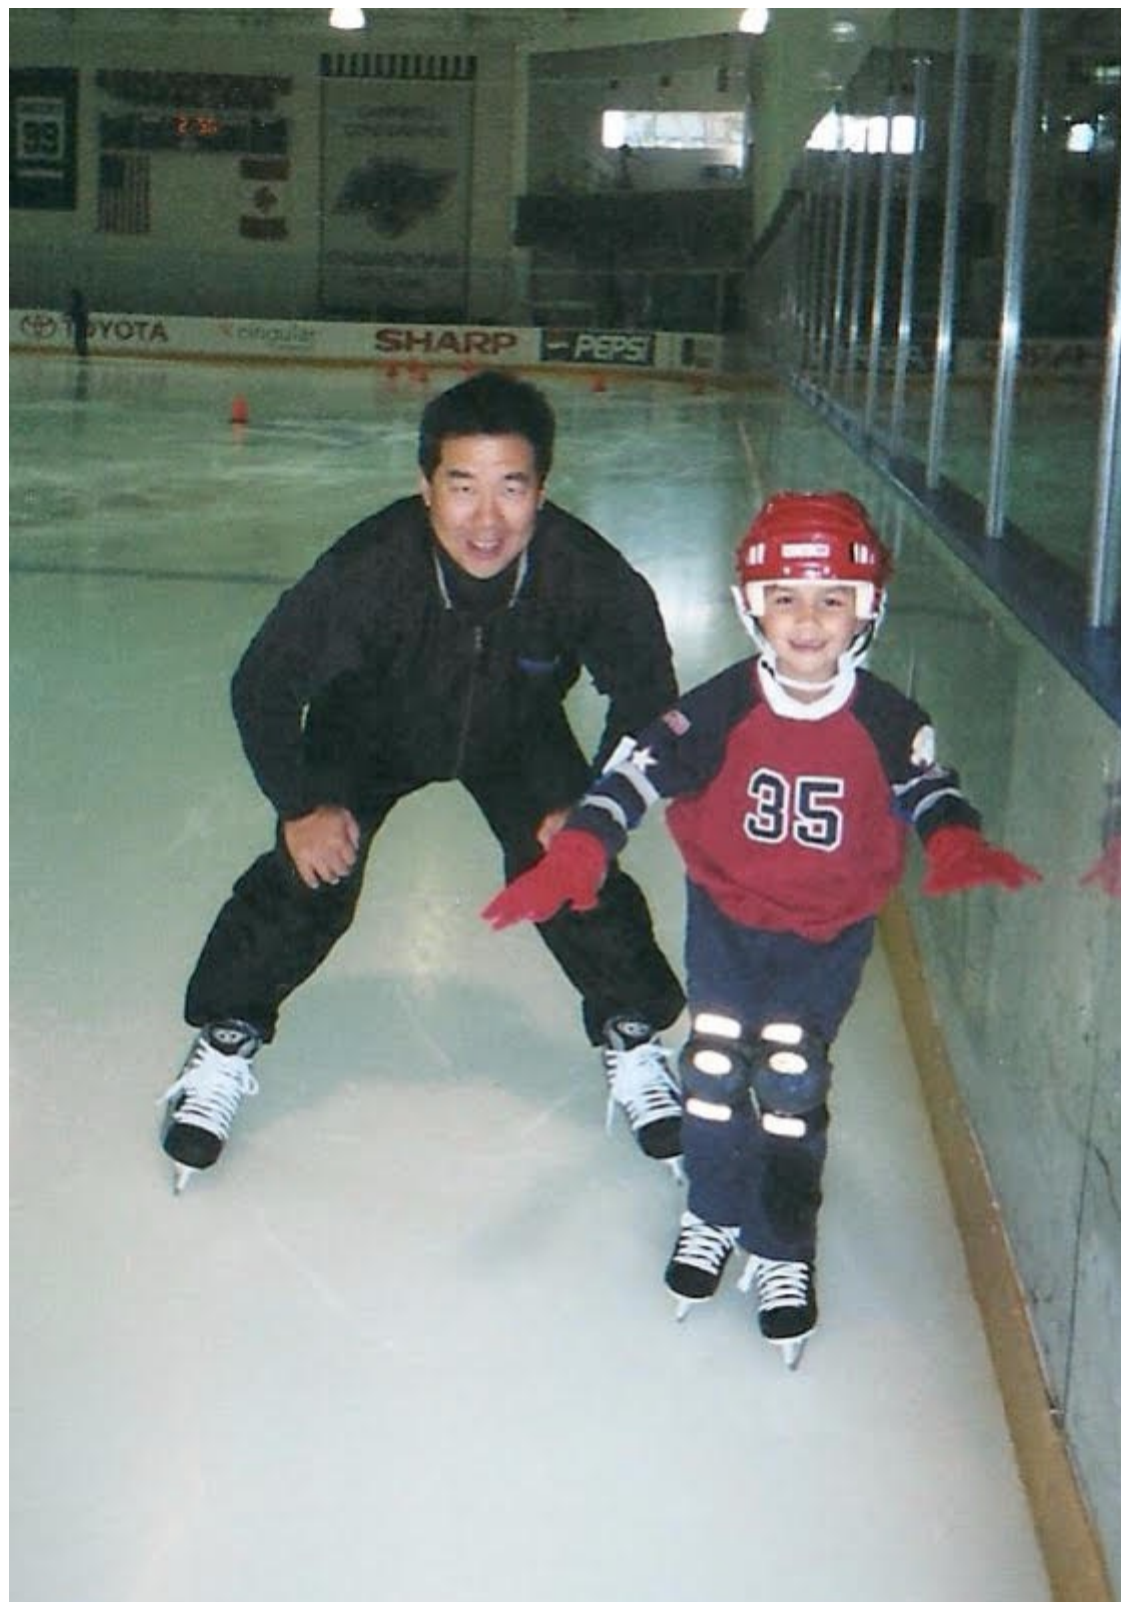

Hudson Ling

Preface

My Repurposing narrative spans from age seven to present and requires imagery and visualization to feel and understand the piece. Remediation: Take your Repurposing idea and translate the work into a different medium. Song, video, poem, picture, or anything that builds off of or complements the Repurposing piece. Initially, I tried to get creative and complex. But then I thought about the complementary need for imagery in this piece. It could be simple: 10 pages of writing, 12 images, one boyhood development.

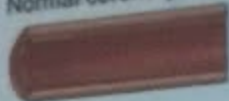

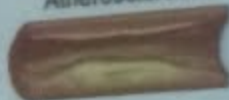

What is heart disease?

Atherosclerosis

Normal coronary artery

Atherosclerosis

Atherosclerosis with blood clot
